Read and Make a Bar Graph

CA Standard
SDAP 1.2, SDAP 1.4

1. The vet makes a bar graph to show how many animals stay overnight. There are 6 dogs, 7 cats, and 1 hamster. How many boxes will she color to show the cats?

2. Bob makes a bar graph to show all the colors of his bed sheets. 3 of his sheets are blue. 2 of his sheets are white. 4 of his sheets are tan. How many boxes does he color in to show the tan sheets?

3. Matt makes a bar graph to show the life span of animals. A deer lives 8 years, a giraffe lives 10 years and a dog lives 12 years. How many more years does a dog live than a deer?

4. Sally makes a bar graph to show her friends' favorite seasons. 2 like spring, 3 like fall, 4 like winter, and 8 like summer. How many more people like summer than winter?

5. Sam makes a bar graph of his classmates' favorite sandwiches. 2 like cheese the best. 4 more students like bologna than cheese. 1 more person likes peanut butter and jelly than bologna. How many like peanut butter and jelly?

6. Judy polls her friends for their favorite color. 5 like purple the best. 3 more people like blue than purple. 2 less people like yellow than blue the best. How many people like yellow?
