

## Add 2-Digit Numbers in Different Ways

**CA Standards**  
**KEY** NS 2.2, MR 1.2**Solve.**

1. Melanie has 12 pennies and Chantal has 13 pennies. Use secret code cards to see how much money they have together.

\_\_\_\_\_ pennies

3. Elise read 18 pages in her book last night, and she will read 19 more pages tonight. Use secret code cards to find how many pages she read in both nights.

\_\_\_\_\_ pages

5. Raoul bought a bag of 40 peanuts. He ate 23 of them at the movie. How many did he have left?

\_\_\_\_\_ peanuts

2. Roger runs for 18 minutes and jogs for 10 minutes. How many minutes does Roger exercise? Use counters to solve.

\_\_\_\_\_ minutes

4. Renga wrote thank you notes to his relatives. He wrote 15 in the morning and 17 in the afternoon. Use counters to find how many he wrote all together.

\_\_\_\_\_ notes

6. Marla has three secret code cards. The first shows a 37. The second card has the first box blanked out, and the second box is a 2. The two code cards together equal the third card, which is 59. What is the missing number?
