Multiply Two-Digit Numbers

Multiply.

1. A box holds 10 yo-yos. How many yo-yos are in 4 boxes?

2. Mr. Tomkins is making yo-yos. He can make 12 yo-yos an hour. How many yo-yos can he make in 3 hours?

3. He uses 2 feet of string in each small yo-yo. How much string will he use in 14 small yo-yos?

4. He uses 4 feet of string in each jumbo yo-yo. If he makes a dozen jumbo yo-yos, how much string will he use?

5. He uses 2 end pieces and 1 middle piece for each yo-yo. How many end and middle pieces will he need for two dozen yo-yos?

6. Mr. Tomkins gave 3 boxes of yo-yos to third graders at Sunset Elementary. Each box contains 20 yo-yos. There are 2 third-grade classes. Each class has 23 students. Are there enough yo-yos to give one to each student? Explain your answer.
