

Problem Solving: **Choose the Operation**

A jar has 315 blue beads and 170 green beads.
How many more blue beads than green beads
are in the jar?

UNDERSTAND

What do you know?

What do I need to find out?

PLAN

What operation can I use to
find how many more?

SOLVE

Find how many more blue beads
than green beads there are.

_____ more blue beads

LOOK BACK

How did you decide which
operation to use?
