Problem Solving: Use a Picture

Cassie cuts a cake into 12 equal pieces.
Her friends eat 8 pieces of the cake.
What fraction of the cake do they eat?

$$\frac{8}{12}$$

UNDERSTAND

What do I need to know?
What do you know?

PLAN

I'll shade the picture of the cake to show how many pieces Cassie's friends ate.
How many parts should I shade? Explain.

SOLVE

How should I write the fraction?

LOOK BACK

How can I check that my answer is correct?
