

## Problem-Solving Application: Use Proportions

Use the questions to help you solve.  
Round all answers to the nearest ones.

1. On a recent trip to Washington, D.C., Julia measured some shadows. The shadow of the Washington Monument was 202.8 meters long. The shadow of the Vietnam Veterans Memorial Wall was 3.75 meters long. Julia's shadow was 1.8 meters long. Julia is 1.5 meters tall. How tall are the Washington Monument and the Vietnam Veterans Memorial?

**UNDERSTAND**

What do you know that will help you solve the problem? \_\_\_\_\_
