Use Mental Math with Addition

TAKS Objective 1
TEKS 2.3B

Use mental math to solve.

1. On the train, Don counts 12 men and 14 women. How many people does Don count on the train?

Hint: $12 + 12 = \underline{\hspace{2cm}}$
14 is 2 more than 12.

_____ people

3. Don rides the train 23 miles on Monday and 25 miles on Tuesday. How many miles does Don ride in the 2 days?

_____ miles

5. Don spends a total of 75¢ for snacks on the train. He spends 24¢ for peanuts and the rest on a drink. How much does Don spend on the drink?

2. After the first stop, there are 23 people on the train. 22 more people get on the train. Now how many people are on the train?

Hint: $22 + 22 = \underline{\hspace{2cm}}$
23 is 1 more than 22.

_____ people

4. Don reads 41 pages of his book on Monday and 44 pages of his book on Tuesday. How many pages does Don read altogether in the 2 days?

_____ pages

6. Don counted the peanuts in the bag. He eats 27 of them and now there are 33 left. How many peanuts were in the bag at first?

_____ peanuts
