TAKS Objective 1, 2
TEKS 3.3A, 3.3B, 3.7B

Use the table to solve.

1. How many mammals in the United States are classified as threatened or endangered?

2. How many threatened or endangered insects are there in the United States?

3. Barry says that he does not need to regroup ones to find the total number of endangered or threatened fish in the United States. Is he correct?

4. Beatrice says the total number of threatened and endangered birds is 82. What mistake did she make in her addition? What is the correct total?

5. Are there more threatened and endangered amphibians or reptiles? Give the total number of each in your answer.

6. Clams, snails, and crustaceans all have shells. One of these groups of animals has more than 50 endangered or threatened species in all. Which group is it?

Threatened and Endangered Animals in the United States		
Animal Group	Number Threatened	Number Endangered
Mammals	9	65
Birds	14	78
Reptiles	22	14
Amphibians	9	12
Fish	44	71
Clams	8	62
Snails	11	21
Insects	9	35
Crustaceans	3	18
