Problem Solving: Draw a Picture

TAKS Objective 6
TEKS 3.14A

Use the data in the box to solve problems 1–2.

	General Admission	
	Adults	\$8.00
	Children & Seniors	\$5.00
	Admission to Petting Zoo	\$2.00
	Pony Rides	\$3.00

1. The Henderson family went to the zoo. There were 2 adults and 2 children. How much did they pay for admission?

2. Mrs. Henderson took her daughter to the petting zoo once they were inside. She also treated her to a pony ride. How much more did she pay?

3. There were 12 sheep in the petting zoo. There were 3 times as many chickens and 2 times as many ducks. How many chickens and ducks were there?

4. Mr. Henderson and his son visited the ape house. They saw 40 monkeys, 10 chimpanzees, and 5 gorillas. How many times more monkeys than chimpanzees were there? How many times more chimpanzees than gorillas?

5. The Chee family paid \$44 for admission to the zoo. The cost included three children and their grandfather. How many adults paid full admission?

6. One day, 144 people visited the zoo. Of that number, 24 were senior citizens. Of the remaining number, there were twice as many children as adults. How many of each were there?
