Problem Solving: Draw a Picture

TAKS Objective 6
TEKS 3.14C

Solve. Draw a picture if you need help.

1. The art museum opened in 1966. How old was it in 2006?

3. The oldest European painting in the museum's collection is 600 years old. The oldest American painting is from 1800. About how many times older is the European painting than the American one?

5. The museum gift shop sells a box of greeting cards for \$6.00. If there are a dozen cards in a box, what is the value of each card?

2. Admission to the museum was \$4 per student. Teachers got in for free. It cost \$80 for the class to get in. How many students were on this field trip?

4. The museum has 250 paintings, 150 sculptures, and 100 other art objects on display. How many more times are paintings and sculptures on display than other objects?

6. One mural in the museum is 12 feet long. The smallest painting is only 4 inches long. How many more times longer is the mural than the painting? Remember there are 12 inches in a foot.
