

Use Place Value Through Hundred Thousands

TAKS Objective 1
TEKS 4.1A

Use the table for problems 1–6.

1. What is the area of California? Write this number in word form.

2. Which state has an area of about one hundred four thousand square miles?

3. The area of Florida is about 100,000 square miles less than the area of California. What is the approximate area of Florida?

4. Which state on the table has the greatest area? Can you tell by looking at the first digit of each number? Explain your reasoning.

5. Write the names of the states in order from largest to smallest.

6. Which three states are closest in size?

Area of States (square miles)	
State	Area
Alaska	578,878
Arizona	114,007
California	158,648
Colorado	104,100
Montana	147,047
Nevada	110,567
New Mexico	121,599
Texas	266,874
