

Name _____ Date _____

Round Whole Numbers

TAKS Objectives 1, 3
TEKS 4.5A, 4.10

Solve.

1. The tallest peak of the Appalachian Mountains is Mount Mitchell at 6,684 feet. How high is that to the nearest hundred feet?

3. Suppose the deepest part of the Pacific Ocean is 35,837 feet deep. Round this depth to the nearest hundred feet.

5. Suppose the United States has 872,564 square miles of forest. Round this area to the greatest place value.

2. The longest river is the Nile, which is 4,145 miles long. What is this distance rounded to the nearest thousand miles?

4. The United States is the country with the greatest area of inland water. It has 292,126 square miles of water. What is this area rounded to the nearest ten thousand square miles?

6. Greenland is the largest island. It has an area of 2,166,086 square kilometers. What is this area rounded to the nearest hundred thousand square kilometers?
