

Choose a Strategy

TAKS Objectives 1, 6
TEKS 4.3A, 4.14A, 4.14B,
4.15A, 4.16B

Make a diagram and then write a number sentence to solve each problem.

1. Margo took 78 photographs with a digital camera. If she saved 38 of these photographs, how many did she delete?

3. During a family trip, Joaquin counted the number of Texas redbud trees he saw out the car's left side window, and his sister counted the number of Texas redbuds she saw out the car's right side window. In all, the siblings saw 132 Texas redbuds. If Joaquin saw 76, how many did his sister see?

5. There are 237 girls at Alarico's elementary school. In addition, 226 boys attend the school. How many students go to Alarico's school?

2. Two nights before giving an oral presentation at school, Keith memorized the 60 words of the first paragraph of a speech. The next night he memorized the 75 words of the second paragraph of the speech. How many words did he memorize in all?

4. Mabel inflated balloons with helium to decorate for a party. She inflated 83 blue balloons and 149 yellow balloons. How many balloons did Mabel inflate?

6. Lawna measured a wood board before cutting it. The board was 144 inches long, and Lawna marked her cutting line across the board at the 98-inch mark. After Lawna makes this cut, how many inches of the original board will remain?
