

Strategies for 12s

TAKS Objectives 1, 2
TEKS 4.4C, 4.6A

Multiply. Use a strategy if you need help.

1. During a period of one year, Alicia read 4 books each month. How many books did Alicia read during those 12 months?

3. Monique was stacking pieces of firewood against the side of the shed in rows of 12. If Monique stacked 6 rows, how many pieces of firewood did she stack in all?

5. Elbanco is measuring and cutting a 9-foot sheet of mural paper for his teacher. How many inches long will the sheet be?

2. Hal receives an allowance from his parents of \$6 each week. How much allowance does Hal receive after 12 weeks?

4. Rizwan needs a dozen strips of masking tape and each strip needs to be 8 inches long. How many inches of masking tape does Rizwan need?

6. On her 11th birthday, Elvia counts up the number of months she has been alive. How many months old is Elvia?
