

Regroup in Division

TAKS Objective 1
TEKS 4.4E, 4.5B, 4.14D**Solve.**

1. An art teacher put 52 paintbrushes in 4 jars of water. If she put the same number in each jar, how many paintbrushes were in each jar?

3. Mrs. Rosenberg collected 84 leaves for her art class to use. If each student uses 5 leaves to make a design, how many designs will be made? How many leaves will be left over?

5. In art class, 67 drawings were made. All of the students except Carla made 4 drawings. Carla made fewer than 4 drawings. How many drawings did Carla make?

2. There are 52 sheets of drawing paper. The teacher wants to have as many sheets of paper as he can in 3 equal piles. How many sheets will be in each pile?

4. There were 98 crayons in a container. Timothy divided the crayons equally into boxes of 8 crayons each. How many boxes were completely filled?

6. Kip bought 4 paint sets at the craft store. He gave the clerk \$60. His change was \$4. How much was each paint set? Explain how you found your answer.
