

# Estimate and Measure Customary Weight

**TAKS** Objectives 4, 6  
**TEKS** 4.11A, 4.14D

Solve. Use what you know about customary units of weight to help you.

1. Chris is buying peaches to bake a pie. Which is he more likely to buy—2 ounces of peaches or 2 pounds of peaches?

\_\_\_\_\_

3. Which is heavier—2 ounces of raisins or 2 pounds of raisins?

\_\_\_\_\_

5. Carlos is weighing a letter to find the correct postage. Is the letter more likely 4 ounces or 4 pounds?

\_\_\_\_\_

2. Which animal would you weigh using pounds—a horse or a duck?

\_\_\_\_\_

4. Janet isn't sure about how much to feed her dog. Should she feed her dog 8 ounces of food or 8 pounds of food?

\_\_\_\_\_

6. Which object is heavier—20 ounces of rocks or 20 pounds of popcorn?

\_\_\_\_\_
