

# Write Addition and Subtraction Equations

**TAKS Objectives 1, 2, 6**  
**TEKS 5.3A, 5.6, 5.14A**

Write an equation for each problem. Then use mental math or number sense to solve.

1. Kevin bought a hat for \$8. He has \$14 left. How much money did Kevin have before he bought the hat?

---

---

3. The longest passenger ship in the world is the *Queen Mary 2*. The *Jahre Viking* is an oil tanker which is 372 feet longer than the *Queen Mary 2*. If the *Jahre Viking* is 1,504 feet long, what is the length of the *Queen Mary 2*?

---

---

---

5. Lawrence is thinking of 2 numbers. The greater number is 25 more than the other number and the sum of the 2 numbers is 65. What are the numbers?

---

---

---

---

2. Patricia had \$33. Then she bought a bracelet for \$15. How much does Patricia have left?

---

---

4. The deepest lake in the world is Lake Baikal in Russia. It has a maximum depth of 5,369 feet. The deepest part of the ocean is the Marianas Trench. The difference between the depth of the Marianas Trench and Lake Baikal is 30,429 feet. How deep is the Marianas Trench?

---

---

---

6. Jennifer had \$38. She bought 3 tickets to the fair and paid \$1 to park. She had \$25 left. How much did each ticket cost?

---
