

Customary Units of Weight and Capacity

TAKS Objective 4
TEKS 5.10A, 5.10C

Solve.

1. A watermelon weighs 96 ounces. How many pounds is that?

3. A hawksbill turtle weighs 2,400 ounces. Does it weigh more or less than a 180-pound man?

5. Oscar mixed 2 gallons of water with 3 pints of concentrated orange juice. How many 12-ounce glasses will he be able to fill with the orange juice mixture? Will there be any juice mixture left over?

2. Jerry bought 8 gallons of ice cream for a party. How many quarts is that?

4. Edie's mother asked her to buy a gallon of milk on her way home from school. Edie came home with 8 pints of milk. Is this the same amount? Explain.

6. A $2\frac{1}{2}$ ton truck is carrying 9 tons of bananas. What is the total weight in pounds?
