I See a Pattern

Find the totals.

1. \(1 + 1 = \) __________
2. \(2 + 2 = \) __________
3. \(3 + 3 = \) __________
4. \(4 + 4 = \) __________
5. \(5 + 5 = \) __________

What pattern do you see when you look at the totals?

________________________________________

Complete the pattern.

2. 5 1 5 1 5 1
3. 2 2 4 2 2 4 2 2 4
4. 3 3 0 3 3 0 3 3 0

5. Create Your Own  Write your own number pattern.

I See a Pattern

Find the totals.

1. \( \frac{1}{2} + \frac{1}{2} = \) 2
2. \( \frac{2}{2} + \frac{2}{2} = \) 4
3. \( \frac{3}{2} + \frac{3}{2} = \) 6
4. \( \frac{4}{2} + \frac{4}{2} = \) 8
5. \( \frac{5}{2} + \frac{5}{2} = \) 10

What pattern do you see when you look at the totals?

Possible answers: The totals count by 2s.
The totals are even numbers.

Complete the pattern.

2. 5 1 5 1 5 1 5 1 5 1
3. 2 2 4 2 2 4 2 2 4 2 2
4. 3 3 0 3 3 0 3 3 0 3 3

5. Create Your Own  Write your own number pattern.

Patterns will vary. Check children’s work.
