

Challenge

Counters in the Cup

Gina puts some counters on the desk. Teri takes some of the counters and hides them in a cup. Gina wants to find how many counters Teri put in the cup.

1. Gina put down 9 counters.

$$3 + \square = 9$$

\square counters are in the cup.

2. Gina put down 7 counters.

$$2 + \square = 7$$

\square counters are in the cup.

3. Gina put down 8 counters.

$$6 + \square = 8$$

\square counters are in the cup.

4. **Connect It** Gina put down 6 counters. How many counters will Gina have left if Teri puts 2 in the cup? Show your work.

Challenge**Counters in the Cup**

Gina puts some counters on the desk. Teri takes some of the counters and hides them in a cup. Gina wants to find how many counters Teri put in the cup.

1. Gina put down 9 counters.

$$3 + \boxed{6} = 9$$

$\boxed{6}$ counters are in the cup.

2. Gina put down 7 counters.

$$2 + \boxed{5} = 7$$

$\boxed{5}$ counters are in the cup.

3. Gina put down 8 counters.

$$6 + \boxed{2} = 8$$

$\boxed{2}$ counters are in the cup.

4. **Connect It** Gina put down 6 counters. How many counters will Gina have left if Teri puts 2 in the cup? Show your work.

4 counters; $4 + 2 = 6$
