

Challenge

Math Mountain Families

Write the missing partner or total in the Math Mountain. Then complete the four matching equations for the fact family.

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

Challenge

Math Mountain Families

Write the missing partner or total in the Math Mountain. Then complete the four matching equations for the fact family.

$$\boxed{4} + \boxed{2} = \boxed{6}$$

$$\boxed{6} - \boxed{2} = \boxed{4}$$

$$\boxed{2} + \boxed{4} = \boxed{6}$$

$$\boxed{6} - \boxed{4} = \boxed{2}$$

$$\boxed{5} + \boxed{3} = \boxed{8}$$

$$\boxed{8} - \boxed{3} = \boxed{5}$$

$$\boxed{3} + \boxed{5} = \boxed{8}$$

$$\boxed{8} - \boxed{5} = \boxed{3}$$

$$\boxed{7} + \boxed{2} = \boxed{9}$$

$$\boxed{9} - \boxed{2} = \boxed{7}$$

$$\boxed{2} + \boxed{7} = \boxed{9}$$

$$\boxed{9} - \boxed{7} = \boxed{2}$$

$$\boxed{6} + \boxed{4} = \boxed{10}$$

$$\boxed{10} - \boxed{4} = \boxed{6}$$

$$\boxed{4} + \boxed{6} = \boxed{10}$$

$$\boxed{10} - \boxed{6} = \boxed{4}$$
