What's the Sign?

$$(10 - 3) \times 2$$

If there are parentheses around part of an equation, it means "find this answer first." First, find $10 - 3 = 7$, then multiply $7 \times 2 = 14$.

Read each equation from left to right.

Write +, -, ×, or ÷ in each square to make the equation true.

The first one is done for you.

1. $8 \boxed{\times} 5 + 9 = 49$
