

Challenge

Interpret Remainders

There are 70 firefighters who will ride in fire trucks in the Fourth of July parade. Eight firefighters will ride on each fire truck.

Complete.

1. Write and answer a question about the firefighters in the parade for which you have a *left-over* remainder for the answer.

2. Write and answer a question about the firefighters in the parade for which the remainder is the answer.

3. Write and answer a question about the firefighters in the parade for which you have *another whole* remainder.

Challenge

Interpret Remainders

There are 70 firefighters who will ride in fire trucks in the Fourth of July parade. Eight firefighters will ride on each fire truck.

Complete. Question and answers will vary. Samples are given.

1. Write and answer a question about the firefighters in the parade for which you have a *left-over* remainder for the answer.

How many fire trucks will be completely filled in the parade? 8 fire trucks

2. Write and answer a question about the firefighters in the parade for which the remainder is the answer.

How many firefighters will ride on the fire truck that is not filled? 6 firefighters

3. Write and answer a question about the firefighters in the parade for which you have *another whole* remainder.

How many fire trucks are needed to carry all the firefighters in the parade? 9 fire trucks
