

## Challenge

# South American Countries

The table shows the areas of two countries in South America. Use the clues to find the areas of the other countries. Then complete the table.

- The area of Colombia is 1,637,980 square kilometers less than the area of Argentina.
- The area of Peru is 1,088,370 square kilometers greater than the area of Guyana.
- The area of Bolivia is 7,413,385 square kilometers less than the area of Brazil, which is 5,735,075 square kilometers greater than the area of Argentina.
- The area of Paraguay is 209,900 square kilometers greater than the area of Guyana, but 505,300 square kilometers less than the area of Venezuela.
- The area of Ecuador is 123,190 square kilometers less than the area of Paraguay and 120,290 square kilometers greater than the area of Suriname.

Country	Area in Square Kilometers
Argentina	2,776,890
Bolivia	
Brazil	
Chile	
Colombia	
Ecuador	
Guyana	196,850
Paraguay	
Peru	
Suriname	
Uruguay	
Venezuela	

- The area of Chile is 488,270 square kilometers less than the area of Peru.
- The area of Uruguay is 962,690 square kilometers less than the area of Colombia.
