

Challenge

Number Collection

Collect the numbers in the circle to solve each problem. Cross off each number as you use it.

1. Collect the odd numbers whose digits have a sum of 9. Then write the sum and the difference of the greatest and least numbers.

Numbers: _____

2. Collect the even numbers whose digits have a sum of 9. Then write the sum and the difference of the greatest and least numbers.

Numbers: _____

3. Collect the odd numbers whose digits have a sum of 8. Then write the sum and the difference of the greatest and least numbers.

Numbers: _____

4. Collect the numbers whose digits have a sum of 7 or 10. Then write the sum and the difference of the greatest and least numbers.

Numbers: _____

5. Find the sum and the difference of the numbers that are left.

Numbers: _____

Challenge

Number Collection

Collect the numbers in the circle to solve each problem. Cross off each number as you use it.

1. Collect the odd numbers whose digits have a sum of 9. Then write the sum and the difference of the greatest and least numbers.

Numbers: 81, 135, 117

$$\underline{135 + 81 = 216; 135 - 81 = 54}$$

2. Collect the even numbers whose digits have a sum of 9. Then write the sum and the difference of the greatest and least numbers.

Numbers: 144, 216, 162

$$\underline{216 + 144 = 360; 216 - 144 = 72}$$

3. Collect the odd numbers whose digits have a sum of 8. Then write the sum and the difference of the greatest and least numbers.

Numbers: 143, 215, 71

$$\underline{71 + 215 = 286; 215 - 71 = 144}$$

4. Collect the numbers whose digits have a sum of 7 or 10. Then write the sum and the difference of the greatest and least numbers.

Numbers: 52, 124, 262, 172

$$\underline{262 + 52 = 314; 262 - 52 = 210}$$

5. Find the sum and the difference of the numbers that are left.

Numbers: 327, 195

$$\underline{327 + 195 = 522; 327 - 195 = 132}$$
