Letter to Family

Dear Family,

Our class is studying subtraction. I'd like you to do an activity with your child while you are reading a book or watching television. Ask them to find an example of subtraction. For example, there might be 5 people in a room and 2 people leave, so 3 people are left. You can help by giving them some examples that you find. After they have found an example, ask them to draw a picture of what they saw that showed subtraction. I will have the children share their pictures in class.

Your child needs to bring the picture to school by _____.
(date)

Thank you for your help.

Sincerely,
