

Name _____ Date _____

Description of Investigation and Student Report
Be an Investigator

Do you think that the mean height of the members of your group will be greater than, the same as, or less than the mean height of the group that is on page 364 of your math book? Make a prediction. Measure the height of each member of your group in centimeters. Create a bar graph to show the height of each group member. Find the mean, median, and mode of the heights of the people in your group.

Name _____ Date _____

Be an Investigator
Student Report

We predict that the mean height of the members of our group will be _____
_____ (greater than, the same as, less than) the mean height of the group
that is on page 364 of our math book.

This bar graph shows the height of each member of our group.

The mode of the height of the members of our group is _____.

The median of the height of the members of our group is _____.

The mean of the height of the members of our group is _____.

The mean height of the members of our group is _____ (greater
than, the same as, less than) the mean height of the group that is on page 364 of
our math book.
