

Name _____ Date _____

Problem

Find five other facts about outer space that contain a number greater than ten million. For the number in each fact, underline the digit in the ten millions place.

Fact 1: _____

Fact 2: _____

Fact 3: _____

Fact 4: _____

Fact 5: _____

Name _____ Date _____

Data Sheet

Planet	Distance Traveled in One Complete Orbit of the Sun (one “year”)	Amount of Time for One Complete Orbit of the Sun (one “year”)
Mercury	57,900,000 miles	3 Earth months
Venus	108,200,000 miles	7 Earth months
Earth	149,600,000 miles	1 Earth year (365.25 days)
Mars	227,900,000 miles	23 Earth months (Almost 2 Earth years)
Jupiter	778,300,000 miles	142 Earth months (Almost 12 Earth years)
Saturn	1,427,000,000 miles	354 Earth months (29.5 Earth years)
Uranus	2,869,600,000 miles	1008 Earth months (84 Earth years)
Neptune	4,496,600,000 miles	1978 Earth months (Almost 165 Earth years)
Pluto	4,913,500,000 miles	2976 Earth months (248 Earth years)
