Letter to Family

Dear Family,

I would like you to do an activity with your child using some coins. I would like you to put two nickels and at least four pennies into a paper bag with your child watching. Tell your child that he or she is going to draw three coins and then you will figure out what the coins are worth. Have your child draw the three coins. Help your child figure out the value of the coins. For example, if your child drew two pennies and a nickel, the value would be 7¢. Write the value down on a piece of paper for your child to bring to school.

In class I will put the children in partners. They will share the amount of money they got and how they got it.

Your child needs to bring this to school by _____.
(date)

Thank you for your help.

Sincerely,
