Letter to Family

Dear Family,

I would like you to go outside or look out the window with your child. Count two things that are less than 12. You might count the number of birds you see and the number of trees in your yard. Then have your child draw two pictures of what you saw. Help your child label the picture with the number and the object, for example, five trees.

We are going to use these pictures to compare numbers. For example, if you and your child saw five trees and nine birds, I will ask your child to look at the pictures and decide which number is greater.

Your child needs to bring this to school by _____.
(date)

Thank you for your help.

Sincerely,
