

Problem-Solving Strategy:

Write a Number Sentence

Problem Darius baked 40 treats for the 10 dogs staying at his kennel this week. He gave each dog the same number of treats. How many treats did Darius give each dog?

UNDERSTAND

1. What facts in the problem will you use to help you find what you want to know?

PLAN

2. Use the words *separate* and *groups* to describe the problem in your own words.

SOLVE

3. Use your chosen operation, the facts given in the problem, and n to write a number sentence to model the problem. Then solve the problem.

LOOK BACK

4. What different number sentences can you write to check your solution?
