

Problem-Solving Strategy:

Find a Pattern

Problem Ian made his own stationery. He used a computer to make a border around the paper. Look at the design he chose. If he continues the pattern, what will the next two figures be to the right?

UNDERSTAND

1. What do you know?

PLAN

2. What strategy can you use to solve the problem?

SOLVE

3. If the pattern continues, which set of figures would be next?
