

Compare and Order Money

Ray wants to buy a book that costs \$13.04. He has two five-dollar bills, two one-dollar bills, three quarters, three dimes, and three pennies. Does he have enough money to buy the book?

Find the total value of the bills by counting on.

\$5.00 \Rightarrow \$10.00 \Rightarrow \$11.00 \Rightarrow \$12.00

Then find the value of the coins by counting on.

25¢ \Rightarrow 50¢ \Rightarrow 75¢ \Rightarrow 85¢ \Rightarrow 95¢ \Rightarrow \$1.05 \Rightarrow \$1.06 \Rightarrow \$1.07 \Rightarrow \$1.08

Add the value of the bills and the value of the coins. $\$12.00 + \$1.08 = \$13.08$

Compare money amounts. $\$13.08 > \13.04

Solution: Ray has \$13.08, which is enough to buy the book.

Write each amount. Then write the greatest amount and the least amount.

1. _____

2. _____

3. 4 one-dollar bills, 2 quarters, 6 dimes

4. 1 five-dollar bill, 1 dime, 1 nickel

5. 2 one-dollar bills, 2 quarters, 3 dimes, 4 pennies

6. 3 one-dollar bills, 4 dimes, 1 penny

7. Greatest amount: _____

8. Least amount: _____
