

# Problem-Solving Application: Use a Bar Graph

**Read It** Look for information.

How many more people visited the amusement park than the zoo on Saturday?

**Picture It** Here is a bar graph of the number of people who went to each of the four locations on Saturday.

**Solve It** Use the bar graph to solve the problem.

- The bar graph shows 125 people visited the zoo and 200 people visited the amusement park on Saturday. Subtract to find out how many more people visited the amusement park.

$$200 - 125 = \underline{\hspace{2cm}} \text{ people.}$$

**Try These!** Use the bar graph to solve.

- About how many people visited the museum? \_\_\_\_\_
- About how many people visited the zoo and the shopping plaza? \_\_\_\_\_
- What place had the greatest number of visitors? \_\_\_\_\_
- What place had about twice as many visitors as the shopping plaza? \_\_\_\_\_
