Line and Double Line Graphs

The graph shows the amount the classes needed to raise over the past five years for a school trip. Use the line graph to answer Problems 1–3.

1. How much did the cost of the trip increase from 2000 to 2001?

2. Between which two years was there the greatest increase in the cost of the trip?

3. Describe the pattern of the cost increase of the trip over the four-year period? What will the trip cost in 2005? in 2006?

This graph shows the amount of money one class raised from September through January. Use the graph to solve Problems 4–5.

4. Which two months had the exact same amount of sales in both gift cards and wrapping paper?

5. How much money has the class raised from the sale of gift cards? wrapping paper? both?
