area

the number of square units that cover a plane shape

4 square units
centimeter
(cm)
cup (c)
degrees Celsius (°C)

25°C
degrees Fahrenheit (°F)

60°F
The distance from the door to the window is 5 feet.
foot (ft)

12 inches = 1 foot
gallon

1 gallon = 4 quarts
inch (in.)
inch ruler
kilogram (kg)

1 kilogram
The length of the pencil is 8 cubes.
liter (L)

1 liter
meter (m)

100 centimeters = 1 meter
A meter stick is 100 centimeters long.
milliliter (mL)

This holds about 10 drops or 1 milliliter.
ounce

8 ounces = 1 cup
perimeter

perimeter = 8 inches
pint (pt)

1 pint = 2 cups
pound (lb)
quart (qt)

1 quart = 2 pints or 4 cups
square units

A measuring unit used to find the area of plane shapes.
temperature

how hot or cold something is

°Fahrenheit

© Houghton Mifflin Co.
thermometer

an instrument that measures temperature

°Fahrenheit

60°F
volume
tells how much an object can hold

This box can hold about 8 blocks.
Weight measures how heavy an object is.

Both objects weigh 1 pound.
1 yard = 3 feet
A yardstick is 3 feet long.
