

Grade-Level Strand Families

Students without an assignment may choose the Strand and Skill in which they will work. They may choose only from those strands that are appropriate to their grade level. Following is a list of the strand families that are available to students in each grade.

You may assign a student work in a strand that is outside of the default grade-level family. If you want a student to practice skills or play games in a strand outside his or her strand family, indicate Mastered Off-Line for the highest skill in that strand. See page 33.
