

# Range and Mode

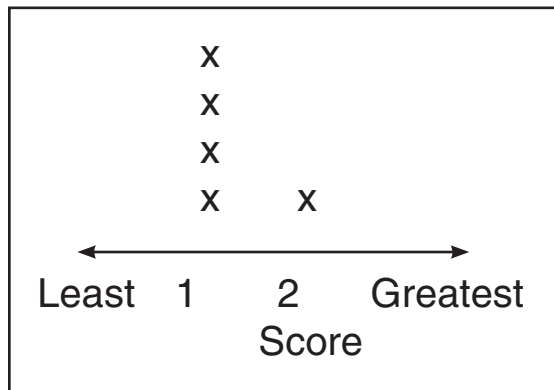

CA Standard  
SDAP 1.3

You can compare data to find how often something happens.

Patty asks her classmates how many laps they can swim underwater.

Use the graph and chart to answer the questions.

Laps Underwater	
Laps	Number of Students
1	4
2	1

The **mode** is the greatest number of students. The **range** is the most students minus the least.

Write a number sentence to show the range of the data.

$$\underline{2} - \underline{1} = \underline{1}$$

Use the chart to answer the questions.

- How many windows do the most students have? \_\_\_\_\_
- Write a number sentence to show the range of the data. \_\_\_\_\_ - \_\_\_\_\_ = \_\_\_\_\_

## Bedroom Windows

Windows	Number of Students
1	7
2	4
3	2

**Writing and Reasoning** Explain how you can find the mode of the number of windows the bedrooms could have.
