

Too Much Information

CA Standard
AF 1.2

Read It Look for information.

Mrs. Lopez takes 26 children to the water park. 5 children in her class have never been to the park. Mr. Green takes 22 children to the same water park. How many children go to the water park in all?

Organize It Decide what information you need.

Look at the question. What do you need to find out? Circle it.

Solve It Will you add or subtract to solve? _____

	Tens	Ones
	2	6
+	2	2

_____ children in all went to the water park.

Number of Children in All	
Mrs. Lopez's Class	Mr. Green's Class
_____ children	_____ children

Circle the information you need. Then solve.

Paul has 42 rocks in his collection. He found 7 of them while hiking. Max has 17 rocks. How many rocks do the boys have in all?

Tens	Ones

_____ rocks in all
