

Create and Solve

CA Standards
KEY NS 2.2, AF 1.3

This chart shows the prices of fruits and vegetables. You can write your own problems that use addition or subtraction.

Groceries in the Store

Variety	Price per pound
Apples	79¢
Potatoes	40¢
Onions	35¢
Lettuce	33¢
Tomatoes	99¢

Use the table above to solve.

1. What costs the most per pound? _____
2. What costs least per pound? _____
3. Which costs more, apples or potatoes? _____
4. What do 2 pounds of potatoes cost? _____
5. What costs more, a pound of potatoes and a pound of onions or a pound of apples? _____
6. How much more per pound do apples cost than lettuce? _____

Writing and Reasoning Write an addition problem that uses the information in the chart. Solve. Explain how you found the answer.
