

Place Value to 10,000

CA Standards
KEY NS 1.3, **KEY** NS 1.5

You can use place-value models and a place-value chart to help you identify the value of each digit in a number.

thousands	hundreds	tens	ones
3	4	3	5

There are different ways to write the number modeled above.

Expanded Form	Standard Form	Word Form
$3,000 + 400 + 30 + 5$	3,435	three thousand, four hundred thirty-five

Write each number two other ways. Use standard form, expanded form, and word form.

1. 1,112

2. $8,000 + 700 + 30 + 9$

Writing Math The number 8 is greater than 3. Then why does the 3 in 7,381 have a greater place value than the 8 right next to it?
