Compare Fractions

CA Standard
NS 3.1

You can make a drawing.

The drawing shows that $\frac{1}{3}$ is greater than $\frac{1}{6}$.

You can use a number line.

$\frac{1}{3}$ is to the right of $\frac{1}{6}$ on the number line, so it is the greater fraction.

So you can write $\frac{1}{3} > \frac{1}{6}$.

Compare the fractions. Write $>$ or $<$ for the box.

$$\frac{2}{4} \square \frac{3}{4}$$

$$\frac{4}{5} \square \frac{3}{5}$$

$$\frac{1}{4} \square \frac{1}{2}$$

$$\frac{2}{3} \square \frac{3}{4}$$

$$\frac{4}{5} \square \frac{3}{10}$$

$$\frac{2}{6} \square \frac{1}{2}$$

Writing Math Which is greater: $\frac{1}{3}$ or $\frac{2}{6}$? How do you know?
