Hands On: Add and Subtract Money Amounts

CA Standards
KEY NS 3.3, MR 2.0

Use what you know about addition and subtraction to add and subtract money.

Raul bought a bag of marbles and a yo-yo at the toy store. How much did he spend in all?

| Item | Cost |
|----------------|--------|
| Bag of marbles | \$3.80 |
| Yo-yo | \$2.04 |
| Pack of cards | \$1.78 |
| Comic book | \$1.50 |

Step 1 Add. Begin with pennies. How many did Raul use? 4

Step 2 Add. How many dimes did he use? 8

Step 3 Add. How many dollars? 5 Now count the money.

Solution: Raul spent \$5.84 at the toy store.

Use the table above and play money to solve the problems.

- What is the total cost of two packs of cards?

- How much more does a yo-yo cost than a comic book?

- How much less does a pack of cards cost than a bag of marbles?

- Morgan had \$5.00. She bought a bag of marbles. How much money did she have left?

- Jamal bought a pack of cards and a comic book. How much did he spend in total?

- Nayer had \$3.82 to spend at the toy store. She bought a yo-yo and a pack of cards. How much money does she have left?

Writing Math Look at Problem 4. Suppose Morgan had 2 one-dollar bills, 6 dimes, and 100 pennies. Would she have any money left after buying the bag of marbles? Explain.
