# Add Money Amounts

CA Standard  
KEY NS 3.3

Solve problems by adding money amounts.

Carter bought a puzzle book for \$3.72 and a bottle of water for \$1.30. How much did he spend?

**Step 1** Add the pennies.  $2 + 0 = 2$

$$\begin{array}{r} \$3.72 \\ +1.30 \\ \hline \phantom{\$}2 \end{array}$$

**Step 2** Add the dimes.  $7 + 3 = 10$ . so I have to regroup them as 1 dollar.

$$\begin{array}{r} \$3.72 \\ +1.30 \\ \hline \phantom{\$}02 \end{array}$$

**Step 3** Add the dollars.  $1 + 3 + 1 = 5$ . Now bring down the dollar sign and decimal point.

$$\begin{array}{r} \$3.72 \\ +1.30 \\ \hline \$5.02 \end{array}$$

**Solution:** Carter spent \$5.02 in all.

**Add.**

1.  $\$6.58$   
 $+3.75$

2.  $\$14.87$   
 $+2.99$

3.  $\$20.22$   
 $+10.50$

4.  $\$9.78$   
 $+0.21$

5.  $\$8.26 + 3.38 =$  \_\_\_\_\_ 6.  $\$3.34 + 0.07 =$  \_\_\_\_\_ 7.  $\$38.99 + 7.11 =$  \_\_\_\_\_

8.  $\$7.43$   
2.21  
 $+1.04$

9.  $\$40.30$   
9.19  
 $+0.80$

10.  $\$18.68$   
14.99  
 $+3.30$

11.  $\$70.51$   
6.83  
 $+11.30$

**Writing Math** Look at Problems 4 and 9. Why does each problem have a number with a zero in the ones place? Explain.
