Solid Figures and Nets

Name the solid figure that can be made with this net.

Think: The faces of the solid are polygons.

Because the figure has four faces that are triangles, the figure will be a pyramid.

Solution: The base of the figure is a square, so the figure will be a square pyramid.

Name the solid figure that can be made with each net.

1. 2. 3.

Name the solid figure each object looks like.

4. 5.

Writing Math What does a net tell you about the faces of a solid figure?
