What We’re Learning
During the next few weeks, our math class will be learning about adding and subtracting three-digit numbers with and without regrouping.

You can expect to see work that provides practice with adding and subtracting three-digit numbers. There will also be work that provides practice using money.

As we learn about three-digit addition and subtraction, you may wish to use the following sample as a guide.

Vocabulary
► decimal point The point used to separate dollars and cents.
► dollar sign The sign ($) used to indicate dollars.
► estimate An approximate amount, rather than an exact amount.
► hundred A group of 10 tens.
► regroup To rename a number by trading ones, tens, and hundreds.

Guiding Your Child

Addition With Regrouping

```
  452
+ 139
```

```
  591
```

To add, regroup 10 ones as 1 ten.

Subtraction With Regrouping

```
  582
  259
```

```
  323
```

To subtract, regroup 1 ten as 10 ones.

Sincerely,
Your child’s teacher
