What We’re Learning

During the next few weeks, our math class will be learning about measurement and money.

Following each lesson, there is an At-Home activity for you to do with your child to provide practice with comparing size, weight, and capacity and with understanding the value of pennies, nickels, and dimes.

As we learn about measuring lengths and identifying coins, you may want to use the following sample as a guide.

Vocabulary

► heavier, lighter To compare the weight of objects.
► holds more, holds less To compare the capacity of containers.
► penny One cent.
► nickel Five cents.
► dime Ten cents.

Guiding Your Child

Comparing Lengths

shorter

longer

Identifying Coins

penny

nickel

dime

Sincerely,

Your child’s teacher
