

Dear Family,

Your child is learning about place value and will use this knowledge of place value to add 2- and 3-digit numbers.

As we begin this unit, your child will show or represent numbers using drawings. Children have been representing numbers using drawings like this:

Then, they will begin to represent numbers using Quick Hundreds and Quick Tens.

Try giving your child a 2- or 3-digit number and ask your child to make a drawing to represent that number.

Later in this unit, children will work on adding 2-digit numbers using the drawings to help them. They can make Proof Drawings with boxes, sticks, and circles to demonstrate how a new ten is formed from 10 ones.

Thank you. Please call or write if you have any questions.

Sincerely,  
Your child's teacher
