

Dear Family,

This unit is about solid figures, such as cubes, spheres, prisms, and cylinders.

During this unit, your child will learn how to recognize and name solid figures, and how to describe their characteristics. Your child will be working with the figures shown below.

The next unit involves fractions. As students work with fractions, they will need to multiply and divide. If your child needs practice with multiplication and division, you can help by providing him or her with as many opportunities as possible to do so. If you need practice materials or if you have any questions, please call or write to me.

Sincerely,
Your child's teacher
