

Dear Family:

Children in our class are discovering and finding shapes in their world. They are examining the shapes of books, windows, wheels, televisions, coins, traffic signs, and so on. You can help your child learn by asking what shapes he or she can see and name in and around your home. Your child can practice drawing different shapes, too!

Look below to see some of the many different kinds of shapes our class will explore this school year:

We would love to hear about shapes your child has discovered at home. Tell your child to share them with us at school!

Thank you.

Sincerely,  
Your child's teacher
